Fishing Information

- The Ontario government is trying to promote the sport of angling without promoting the over harvesting of fish. With that in mind they also offer a Conservation License in addition to the regular Sport Fishing License. It is recommended that you kill only what you can immediately use. Only take home what you take on any day and keep the catch on ice. For the best flavor avoid freezing and use right away.

Fishing License Information

- Conservation Licenses promote conservation principles. They cost significantly less than a regular license and involve lower catch and possession limits.
- Anyone who is not an Ontario resident must purchase a Non-Resident Sport Fishing License.
- Non-residents under 18 may fish without a license if accompanied by a licensed person. Any fish caught by an angler under 18 is considered part of the catch and possession of the person with them who holds the license.

Non- Residents (Approx Prices)
